BENEOUA TP / EXPERTISE

Construction expertise.

BUILD / PRODUCE / CONNECT

Civil works and buildings, earthworks and platforms, roads, hydraulic works and drainage: interventions tailored to each project scope. Equipment services complement these activities.

THREE DOCUMENTED PROJECT REFERENCES

Bouaké / Water supply programme

Heavy grading and access tracks, pipeline corridor interventions and equipment contributions. Separate missions and amendments are documented between 2022 and 2026.

San-Pédro / Water intake

Dredging and bank protection around the water intake: mission documented from June 2023 to April 2024.

Dabakala / Roads

Work on roads 6 and 7, followed by separate amendments. Phases documented from March 2024 to August 2025.

The photograph illustrates BENEOUA trades and is not attributed to any of these operations. References describe missions declared in the technical dossier, rather than delivery of the entire programmes.

Concrete, in elements.

BUILD / PRODUCE / CONNECT

Product ranges for drainage, site development and construction. Specify the application, dimensions, quantities, location and schedule so our team can prepare the enquiry.

Concrete pipes

Diameters listed: 600, 800, 1,000 and 1,200 mm.

Concrete drains

Sections, covers and requirements to be defined for the project.

Concrete kerbs

Types A2, T2, A2CS2 and T2CS2 are listed in the technical dossier.

Concrete pavers

Formats and laying patterns to be defined for the intended use.

Masonry blocks

Solid and hollow elements; formats to be confirmed.

Properties, expected performance, tests, availability, lead times and delivery terms must be confirmed during consultation. This brochure is not a conformity certificate or price list.

BENEOUA PRÉFA / SIAGO PROJECT

A resource to develop.

BUILD / PRODUCE / CONNECT

Map data: Natural Earth.
Indicative location.

Siago / Didibango, near Bondoukou. Studies consider a crushed aggregate quarry serving construction and infrastructure works.

THE PRODUCT FAMILIES CONSIDERED

Crushed sand 0/5

Gravel 5/15

Gravel 15/25

Unbound 0/31.5

Rubble / armourstone

R6 concept model: layout and equipment must be checked against revised studies. Aggregate images illustrate the range under study. They are not characterised Siago samples or evidence of stock. Properties and availability remain to be confirmed.

A PROJECT? LET'S PREPARE THE NEXT STEP.

Civil works, precast products, aggregates or partnerships:
share your requirements, quantities and relevant documents.
